Int J Biomed Comput, 27 (1991) 293—295
Elsevier Scientific Publishers Ireland Ltd.

SUBJECT INDEX

Volume 27 (1991)

Adaptive segmentation, pattern recognition, non-linear modeling, chaos theory, quantitative EEG analysis, 95
Alienor technique, global optimization, fractal transformation, function approximation, models identification, 215
ANOVA, a priori test, BASIC program, approximate sample size estimate, simulation, 193
Antidotes, birth control, bone auscultatory percussion, cardiac pacemakers, Computerized Clinical Information System (CCIS), L Sophia, orthopedics, Poisindex, 71
Approximate sample size estimate, ANOVA, a priori test, BASIC program, simulation, 193
Arrhythmia monitoring, ECG analysis, fuzzy reasoning, 245
Auditory perception, difference limen, just-noticeable difference, psychophysics, information theory, perception, 157
A priori test, ANOVA, BASIC program, approximate sample size estimate, simulation, 193

BASIC program, ANOVA, a priori test, approximate sample size estimate, simulation, 193
Biological models, computer simulation, risk factors, logistic models, coronary disease, 133
Biological rhythms, estrous cycle, periodogram, 125
Birth control, antidotes, bone auscultatory percussion, cardiac pacemakers, Computerized Clinical Information System (CCIS), L Sophia, orthopedics, Poisindex, 71
Bone auscultatory percussion, antidotes, birth control, cardiac pacemakers, Computerized Clinical Information System (CCIS), L Sophia, orthopedics, Poisindex, 71

Cardiac pacemakers, antidotes, birth control, bone auscultatory percussion, Computerized Clinical Information System (CCIS), L Sophia, orthopedics, Poisindex, 71
Cardiovascular disease, cardiovascular reactivity, computerized assessment, computerized analysis, 277
Cardiovascular reactivity, computerized assessment, computerized analysis, cardiovascular disease, 277
Chaos theory, pattern recognition, adaptive segmentation, non-linear modeling, quantitative EEG analysis, 95
Class separability, discriminant analysis, postoperative cardiac patients, intensive care unit, 201
Command languages, ortho-dock software, Robodoc, cycle compression, human factors, menus, task analysis, rapid prototyping, 1
Communication systems, computed radiography, optical density, picture archiving, standards for imaging network, 151
Computed radiography, communication systems, optical density, picture archiving, standards for imaging network, 151
Computer-aided jaundice, diagnosis, 47
Computerized analysis, cardiovascular reactivity, computerized assessment, cardiovascular disease, 277
Computerized assessment, cardiovascular reactivity, computerized analysis, cardiovascular disease, 277
Computerized Clinical Information System (CCIS), antidotes, birth control, bone auscultatory percussion, cardiac pacemakers, L Sophia, orthopedics, Poisindex, 71
Computer simulation, biological models, risk factors, logistic models, coronary disease, 133
Computer simulation, models, theoretical, immune response, neoplasms, diet therapy, etiology, metastasis, 27
Coronary disease, computer simulation, biological models, risk factors, logistic models, 133
Correlation technique, ocular fundus, scanning laser ophthalmoscopy, tracking, image processing, 59
Cycle compression, ortho-dock software, Robodoc, human factors, menus, command languages, task analysis, rapid prototyping, 1

Decision support system, transferability, epidemiology, terminology, methodology, knowledge acquisition, 7
Diagnosis, computer-aided jaundice, 47
Diet therapy, models, theoretical, computer simulation, immune response, neoplasms, etiology, metastasis, 27
Difference limen, just-noticeable difference, psychophysics, information theory, auditory perception, perception, 157
Discriminant analysis, class separability, postoperative cardiac patients, intensive care unit, 201

ECG analysis, arrhythmia monitoring, fuzzy reasoning, 245
ECG processing, fuzzy K-NN classifiers, ventricular arrhythmia detection, fuzzy C-means algorithm, fuzzy covariance algorithm, 77
Epidemiology, transferability, decision support system, terminology, methodology, knowledge acquisition, 7
Estrous cycle, biological rhythms, periodogram, 125
Etiology, models, theoretical, computer simulation, immune response, neoplasms, diet therapy, metastasis, 27

Forced oscillations, respiratory mechanics, random noise, 261
Fractal transformation, global optimization, alienor technique, function approximation, models identification, 215
Function approximation, global optimization, alienor technique, fractal transformation, models identification, 215
Fuzzy C-means algorithm, fuzzy K-NN classifiers, ECG processing, ventricular arrhythmia detection, fuzzy covariance algorithm, 77
Fuzzy covariance algorithm, fuzzy K-NN classifiers, ECG processing, ventricular arrhythmia detection, fuzzy C-means algorithm, 77
Fuzzy K-NN classifiers, ECG processing, ventricular arrhythmia detection, fuzzy C-means algorithm, fuzzy covariance algorithm, 77
Fuzzy reasoning, arrhythmia monitoring, ECG analysis, 245

Global optimization, alienor technique, fractal transformation, function approximation, models identification, 215

Human factors, ortho-dock software, Robodoc, cycle compression, menus, command languages, task analysis, rapid prototyping, 1

Image processing, ocular fundus, scanning laser ophthalmoscopy, tracking, correlation technique, 59
Immune response, models, theoretical, computer simulation, neoplasms, diet therapy, etiology, metastasis, 27
Information theory, difference limen, just-noticeable difference, psychophysics, auditory perception, perception, 157
Intensive care unit, class separability, discriminant analysis, postoperative cardiac patients, 201

Just-noticeable difference, difference limen, psychophysics, information theory, auditory perception, perception, 157

Knowledge acquisition, transferability, decision support system, epidemiology, terminology, methodology, 7

Logistic models, computer simulation, biological models, risk factors, coronary disease, 133
Long-term electrocardiograms, risk stratification, 175
L Sophia, antidotes, birth control, bone auscultatory percussion, cardiac pacemakers, Computerized Clinical Information System (CCIS), orthopedics, Poisindex, 71

Menus, ortho-dock software, Robodoc, cycle compression, human factors, command languages, task analysis, rapid prototyping, 1
Metastasis, models, theoretical, computer simulation, immune response, neoplasms, diet therapy, etiology, 27
Methodology, transferability, decision support system, epidemiology, terminology, knowledge acquisition, 7
Models, theoretical, computer simulation, immune response, neoplasms, diet therapy, etiology, metastasis, 27
Models identification, global optimization, alienor technique, fractal transformation, function approximation, 215

Neoplasms, models, theoretical, computer simulation, immune response, diet therapy, etiology, metastasis, 27

Non-linear modeling, pattern recognition, adaptive segmentation, chaos theory, quantitative EEG analysis, 95

Ocular fundus, scanning laser ophthalmoscopy, tracking, image processing, correlation technique, 59
Optical density, communication systems, computed radiography, picture archiving, standards for imaging network, 151
Ortho-dock software, Robodoc, cycle compression, human factors, menus, command languages, task analysis, rapid prototyping, 1
Orthopedics, antidotes, birth control, bone auscultatory percussion, cardiac pacemakers, Computerized Clinical Information System (CCIS), L Sophia, Poisindex, 71

Pattern recognition, adaptive segmentation, non-linear modeling, chaos theory, quantitative EEG analysis, 95
Perception, difference limen, just-noticeable difference, psychophysics, information theory, auditory perception, 157
Periodogram, biological rhythms, estrous cycle, 125
Picture archiving, communication systems, computed radiography, optical density, standards for imaging network, 151
Poisindex, antidotes, birth control, bone auscultatory percussion, cardiac pacemakers, Computerized Clinical Information System (CCIS), L Sophia, orthopedics, 71
Postoperative cardiac patients, class separability, discriminant analysis, intensive care unit, 201
Psychophysics, difference limen, just-noticeable difference, information theory, auditory perception, perception, 157

Quantitative EEG analysis, pattern recognition, adaptive segmentation, non-linear modeling, chaos theory, 95

Random noise, forced oscillations, respiratory mechanics, 261
Rapid prototyping, command languages, ortho-dock software, Robodoc, cycle compression, human factors, menus, task analysis, 1
Recidivism, smoking, survival models, 231
Respiratory mechanics, forced oscillations, random noise, 261
Risk factors, computer simulation, biological models, logistic models, coronary disease, 133
Risk stratification, long-term electrocardiograms, 175
Robodoc, ortho-dock software, cycle compression, human factors, menus, command languages, task analysis, rapid prototyping, 1

Scanning laser ophthalmoscopy, ocular fundus, tracking, image processing, correlation technique, 59
Simulation, ANOVA, a priori test, BASIC program, approximate sample size estimate, 193
Smoking, survival models, recidivism, 231
Standards for imaging network, communication systems, computed radiography, optical density, picture archiving, 151
Survival models, smoking, recidivism, 231

Task analysis, ortho-dock software, Robodoc, cycle compression, human factors, menus, command languages, rapid prototyping, 1
Terminology, transferability, decision support system, epidemiology, methodology, knowledge acquisition, 7
Theoretical, models, computer simulation, immune response, neoplasms, diet therapy, etiology, metastasis, 27
Tracking, ocular fundus, scanning laser ophthalmoscopy, image processing, correlation technique, 59
Transferability, decision support system, epidemiology, terminology, methodology, knowledge acquisition, 7

Ventricular arrhythmia detection, fuzzy K-NN classifiers, ECG processing, fuzzy C-means algorithm, fuzzy covariance algorithm, 77
